

Military Operations Rope

> "Sécurité Intervention"
Ref. 1580 Ø 11 mm

*Tested and approved by
special forces all over the
world !*

Semi-static rope, Ø 11 mm, in black Aramide-Technora®* sheath/ polyamide core. Reinforced sheath.
Conforms to CE and EN Type A standards.

Use: specifically made for helicopter abseiling rope. Thanks to its high tenacity, the Technora® sheath doesn't melt under the overheat due to the metal descenders' chafing.

*Temperature stay +/- 400°C before softnes

Can be only used by very competent people. We recommend you a regular tactile and visual checking and a storage away from UV.
Colour: dark grey

| Type | A |
|-----------------------------------|-------------------------------|
| Impact force | 570 daN |
| Number of falls without breaking | > 5 falls |
| Flexibility to knot | 0,95 |
| Elongation from 50 kg to 150 kg | 3,2 % |
| Weight per meter under 10 kg | 74,9 g/m |
| Diameter under 10 kg | 11,1 mm |
| Breaking load | 3600 daN |
| Breaking strength with figure "8" | > 1500 daN (during 3 minutes) |
| Shrinkage in water | 1,8 % |
| Cover slip | 0 mm |
